About me:

My name is Filip and i am currently a student for Polhemsskolan. I study the Electric program and specialise in Computer science and Programming.

I like to have alot of work at all times otherwise i can get a little bored. I always try to do a good, fast and clean job. I like to take responsibility and to help plan for projects. I work good in groups but sometimes i prefer to work alone because i feel like i can get stuff done faster then.

---

Education:

Electric program, Computer science/Programming

Polhemsskolan, Gävle

I am currently on my third and last year of my Education

Few things we have learned: We have worked alot with servers due to us having a server lab in our classroom. In the lab we do cabling (RJ45, Fiber and Endpoint), installation of new servers and going through the logs/interfaces of the servers. We have been working with HMTL and CSS to build our own websites and we have also been working a bit with Unreal Engine. In the second year we also got to program a RC car. We have also talked and worked with Cyber security.

---

Working Experiences:

Property manager

2022

Working for: HSB, Gävle

During the summerbreak of 2022 I worked for a big company called HSB they are a real estate association, i worked for 6 weeks. My duties was to pick up trash, cut and trim grass and weeding, I also got to clean out garbage rooms , storage rooms and attics. I have alot of people that can be a refrence for my good work and work ethic there. The refrences can be provided upon request.

Painter

2021

Working for: Housing cooperative in Sättra, Gävle

I painted storage rooms and fences for people during the summer of 2021. I have also references from this place that can tell you that im a good worker and have good work ethic. The references can be provided upon request.

---

Interests:

Gym/Training, Tv-series and Computer games.

---

References:

The references from my former jobs can be provided upon request.

---

Skills:

Programming: HMTL, CSS, Unreal Engine, Photoshop

Server room tasks: Connecting new servers, cabling, Proxmox and Truenas and i also feel confident in navigating the server interfaces and logs.

A bit of Cyber security.
